

Kre8 Making Kits for use in Science and Technology Education

Not suitable for children under 3 years old due to small parts.
Any bags provided are not for use by young children.

Age of 8 +

Important Safety Notices

Cutting - Be careful when using **scissors**, snips or side cutters to cut or trim Kre8 connectors, card etc.

Sharp edges - If any of the components have **sharp edge** remove them with the **abrasive paper** provided.

Battery safety - Remove batteries from battery holder when not in use. FIRES can be started if a 'short circuit' occurs causing the battery to heat up and catch fire. ONLY use standard batteries, DO NOT use rechargeable batteries as they can heat up very fast when electrically 'shorted'.

Context - Making with the Kre8 Making System is similar to working in an office with pens pencils, scissors, tape and glues around. The excitement of the students may need to be controlled and planned for when running planning classes and competitions. Younger children may require extra help with some aspects such as using scissors or hole punching. Older children may want to drill holes and use a 'hot glue gun' if using Kre8 with other modelling materials, if so, ensure they have safety training in these activities first.

RISK ASSESSMENT The adult in charge should carry out a 'risk assessment' and to decide what extra help and precautions are needed
